

Thursday 24th November 2022
12:30 - 14:30 hours

Webinar: Childbirth Injury: How is this Managed in Primary Care?

A multidisciplinary webinar organised by The MASIC Foundation with leading speakers, reflecting the diverse professional roles required to co-ordinate and deliver effective evidence based and individualised care for women who have experienced Obstetric Anal Sphincter Injuries (OASI), pelvic floor injuries and their consequences

This webinar will examine the management of a childbirth injury in a Primary Care setting. From GP training opportunities, the 'Six Week Check', Pelvic Floor Protection to Mental Health Issues, GP's need to be aware of the complications of an OASI (Obstetric Anal Sphincter Injury.).
